Wine for Water has made it possible for JustHope to build water systems in three extremely poor communities in Nicaragua – bringing clean water to over 11,000 people! JustHope has also made it possible for children to go to school, farmers to plant crops, and women to start small businesses through microcredit loans. Twenty families have new homes to replace their plastic lean-tos; fifty families now have latrines instead of simple holes in the ground. And all three partner communities have access to far better medical care than they would have without their JustHope Partners. So much has been done because we have worked together with each other and with the people of Nicaragua! And so much more is possible... more clean water, more education, more health care, more jobs... more HOPE!
