

## Celebrating with Community Leaders!

There was a deep pride in Juan Enrique's voice as he gave the end-of-the year Water Project report to the rest of the leaders in Chacraseca. *"After 15 long years, I can say that this project is SUSTAINABLE!"* His report continued, *"This year we paid all our bills for the project and have NO debt! We also replaced a burned out pump without having to ask any North American groups for help. AND"*, he beamed, *"this project was able to give a little help to some of the other projects this year!"*

JustHope's very first project in 2007 was to partner with community leaders to complete the potable water project for the 8,000 residents of Chacraseca. We are as proud as Juan Enrique - the community in Chacraseca have completed the Start Up, Step Up, Stand Up project process - and now is fully managing and maintaining this project!
